(a) Number of deaths per 1,000 of mean population. *The standardized death rate* for 1954 was 6·71. This is computed by the application of the Western Australian death rates, for age groups according to sexes, to a population of standard age and sex distribution. (b) Number of deaths under one year per 1,000 live births. (c) Not available.

No. 17.—Causes of Death, 1954.

Statistics of causes of death in Australia from 1950 are based on the Detailed List of the 1948 Revision of the International Lists of Diseases and Causes of Death. Certain categories have been grouped to facilitate publication, but in all cases the detail required for the Intermediate List of 150 Causes has been preserved, in accordance with World Health Organization Regulations. In general three-digit categories are used, but some four-digit sub-categories have been included to meet Australian requirements.

CENSUS OF THE COMMONWEALTH OF AUSTRALIA, 30th JUNE, 1954.

Abstract of Principal Results for Western Australia

I.—POPULATION.

Prefatory Note.

This publication presents, in a convenient summary form, the principal results of the Census of the Commonwealth of Australia at the 30th June, 1954, as they relate to Western Australian population.

Although its purpose primarily is to show the characteristics of the population, and not of dwellings (which will be the subject of a later issue of this Abstract), it is frequently desired to relate the numbers of persons to the dwellings in a particular area. In this connection, the areas of individual Municipalities and Road Districts are also often significant. Accordingly, Tables 1 and 2 incorporate details of the numbers of dwellings, while area data are also included in Table 1.

The information given in Tables 3 to 10 is based upon a division of the population into (a) Metropolitan, (b) Other Urban, (c) Rural and (d) Migratory. The components of these divisions, with the population and the number of dwellings in each component area, are shown in Table 2.

Metropolitan comprises the Metropolitan Statistical Division.

Other Urban comprises all the country Municipalities, 10 in number, and 20 Non-Municipal Towns, together with the non-metropolitan part of " Fremantle and Suburbs."

Non-Municipal Towns are towns outside the Metropolitan Area which had a population of 1,000 or more at the Census and which, while not separately incorporated for purposes of local government, had boundaries specially determined for census purposes to embrace the urban area which could be regarded as the town.

Rural includes, in their entirety, those Road Districts outside the Metropolitan Area which did not contain a Non-Municipal Town, together with the " non-urban " parts of country Road Districts in which such towns occurred, but excludes the non-metropolitan part of " Fremantle and Suburbs ".

Migratory refers to persons (both passengers and crew) not enumerated elsewhere who at midnight between the 30th June and the 1st July, 1954, were on board ships or were travelling on long distance trains or aircraft.

The tables generally are an abstract of information appearing in greater detail in Volume V, Part I of the official census publications prepared and issued by the Commonwealth Bureau of Census and Statistics. In this Part, which may be obtained from the Government Printer, Canberra (price 2/6 per copy plus 7d. postage within Australia), particulars similar to those here presented in Tables 3 to 10 are shown separately for each of the 19 Municipalities and 128 Road Districts into which the State is divided for local government purposes, for the 11 Statistical Divisions, and for Kalgoorlie and Suburbs and the Non-Municipal Towns.

Particulars of full-blood aboriginals are excluded throughout the tables.

There is available in this Office for reference or, in some cases, on loan a considerable amount of published census material relating not only to Western Australia but also to the other States and Territories. Other information, not published, is available for reference only, notably maps of each of the 1,149 collectors' districts into which the State was divided for census purposes, and machine tabulation sheets showing the number of occupied dwellings and the population in each of these districts classified in certain broad age-groups and according to occupational status.

I am indebted to the Acting Commonwealth Statistician for the information contained in this Abstract, and to his officers for their co-operation in the preparation of the tables.

PERTH, W.A.

* For the purpose of the Census, a "dwelling" is any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or part of a building. The term has, therefore, a very wide reference and includes, in addition to houses and flats, a great variety of "dwellings" ranging from a single-roomed shack to a multi-roomed hotel or institution.

The term "unoccupied dwellings" is not synonymous with vacant houses and flats available for occupancy, but refers mainly to dwellings (including those used for week-end and holiday purposes) whose usual occupants were temporarily absent on the night of the Census. Newly completed dwellings awaiting occupancy are also included.

(*a*) Persons working on own account but not employing others.

(*b*) Includes those who stated that they were usually engaged in work but were not actively seeking a job at the time of the Census by reason of sickness or accident, or because they were on strike, resting between jobs or temporarily laid off. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as " Not at Work," therefore, do not represent the number of unemployed persons available for work and unable to obtain it.

(*c*) Comprises children not attending school, full time students and children attending school, persons of independent means, those engaged in unpaid home duties, pensioners and annuitants, inmates of institutions, and the like. (For further detail, *see* Table 10, Industry).

Table 10.—Industry.

Census, 30th June, 1954.

(Exclusive of full blood aboriginals.)

NOTE.—In reading this table it is necessary to keep clearly in mind certain principles applying to the classification of the population according to industry.

It should be realized that the figures are presented on the basis of industry only and do not refer to occupation. Industry may be defined as any single branch of productive activity, trade or service. It is concerned with the activities of persons, firms or businesses *considered as a group* producing the same commodity, performing the same process or providing the same service. All persons engaged in any such branch of economic activity are classified industrially as belonging to that particular branch *irrespective of their personal occupation* within the industry. Examples are Gold mining (code 080) which includes, in addition to miners and prospectors, such persons as laboratory technicians, transport workers and office staff employed by gold mining companies; Coastal and overseas shipping (code 531) which covers staff members of shipping companies and agencies, as well as ships' crews; professional activities such as Medicine (code 720), Law (code 682) and Architecture (code 741) which include not only qualified practitioners but also persons employed by them as, for example, receptionists, law clerks and draftsmen.

The figures shown under Public Authority Activities (N.E.I.) do not represent the total numbers of persons engaged in or attached to all fields of government service, Commonwealth, State or Local. Public Authority Activities comprise all those in the administrative sphere of general government, local government and foreign consular services, *if not included elsewhere*. For example, employees of the Railways Commission have been assigned, in accordance with evidence contained in their census schedules, to Railway workshops (code 202), Motor bus services (code 524), Construction and maintenance of permanent way (code 511) or Rail services (code 550). Further examples of this allocation of government workers to industries other than Public Authority Activities (N.E.I.) are provided by Departments such as Education, Public Works, Postmaster-General's, Repatriation, etc., and Road Boards and Municipalities.

The Australian Census is a *de facto* one. Persons are enumerated at the place where they spent the night of the Census, and the population so recorded is credited to that place whether or not it is the *usual* place of residence. Those engaged in industry, even though not actually working at the time of the Census, are asked to state the branch of industry in which they are *normally* engaged. For these reasons, figures appear in the Table against industries not carried on in this State or in the particular section of the State under which they are shown. Generally, they represent persons temporarily absent from their usual place of residence.

No. 9.—Expenditure from Consolidated Revenue Fund Classified According to Function, 1954–55.

(*Revised Classification.*)

The general purport of this table is to show in respect to Consolidated Revenue only the gross cost of each function of Government irrespective of the Department or Departments administering such functions.

Certain functions are performed by Semi-Government Authorities and do not affect the Revenue Fund with the exception of Public Debt operations and various subsidies and recoups, *e.g.*, Electricity, Banking, Insurance, Roads. In other cases the Revenue Fund recoups certain losses or receives surplus profits, *e.g.*, Trading Concerns, Fremantle Harbour. (These examples do not necessarily exhaust the two categories.) Public Debt Charges are shown as a separate function.

TRADE OF WESTERN AUSTRALIA.

Year ended 30th June, 1955.

In the following summary all values are expressed in Australian currency and figures in parenthesis relate to the previous year.

1.—SUMMARY.

During the year ended 30th June, 1955, there was an unfavourable trade balance of £45·6 million which exceeded even the high unfavourable balance of £33·6 million for the previous year.

Increases occurred in the value of imports from both oversea countries and the other Commonwealth States, direct purchases from the former rising by 19·1 per cent. to £50·6 million and from other States of the Commonwealth by 10·1 per cent. to £91·0 million.

Total exports increased from £91·7 million in 1953–54 to £96·1 million, this advance being almost entirely due to exports to other Australian States. In trade with Oversea countries exports exceeded imports by £21·4 million, but with the other States of the Commonwealth imports exceeded exports to the extent of £67 million.

Details of the trade balances for the last two years are as follows :—

	1953–54.	1954–55.
	£	£

2.—IMPORTS.

Imports during the year amounted to £141,702,541 compared with £125,212,340 in 1953–54. The United Kingdom was again the principal source, supplying goods to the value of £23,303,186 (£22,819,913), Other British Commonwealth countries were responsible for a total value of £7,406,648 (£7,402,821).

Of the latter, imports from the Republic of India totalled £2,225,803 (£1,636,421) ; Ceylon, £1,240,733 (£1,082,207) ; and Singapore £555,056 (£2,207,479). Reduced shipments of petroleum oils and spirits accounted for the decline in the Singapore figures.

Imports from foreign countries were principally £5,367,074 (£4,368,979) from the United States of America ; £5,046,875 (£116) from Iran (mainly crude petroleum) ; £1,215,021 (£980,063) from Bahrein Islands ; £1,788,128 (£1,738,354) from the Republic of Indonesia ; £822,739 (£497,544) from Belgium ; £808,672 (£659,472) from the Federal Republic of Germany ; and £690,982 (£216,160) from Japan.

Goods from the other Commonwealth States were valued at £91,054,828 (£82,687,077), of which Victoria supplied £41,657,951 (£36,893,679) ; New South Wales, £32,831,271 (£31,027,709) ; South Australia, £12,488,137 (£10,452,786) ; Queensland, £2,761,903 (£2,772,699) ; Tasmania, £1,002,743 (£1,195,726) ; and Northern Territory £312,823 (£344,478).

Purchases from all sources included the following items :—Machinery, £26,604,092 (£25,300,290) ; Petroleum and Shale Oils and Spirit, £15,409,513 (£8,341,598) ; Motor Vehicles and Parts, £14,475,300 (£11,738,789) ; Apparel, £10,741,129 (£10,382,319) ; Iron and Steel, £7,607,929 (£6,389,108) ; Textiles, £6,983,000 (£6,981,934) ; Tyres and Tubes, £2,931,478 (£2,907,109) ; and Tobacco, Cigarettes, and Cigars, £3,026,216 (£2,864,312).

3.—EXPORTS.

Exports totalling £96,094,094, exceeded those of the previous year by £4,441,486 or 4·8 per cent.

Gold exports, principally to New South Wales for shipment oversea, were valued at £9,668,885, compared with £6,615,109 during 1953–54.

Greasy wool exports decreased from 100,701,099 lb., valued at £35,672,828 in 1953–54, to 96,554,322 lb. for a value of £29,648,228, the average f.o.b. value per lb. being 73·70 pence, compared with 85·02 pence for the previous year.

A considerable increase occurred in wheat shipments—19,334,742 bushels for a value of £13,738,962, compared with 6,800,130 bushels for £5,635,764.

Exports of flour realised £3,609,745 as against £5,851,806 in 1953–54.

Petroleum oils and spirit valued at £3,032,080 were exported during the year.

Exports to the United Kingdom totalled £26,223,301 (£28,000,324) and to other British Countries, £14,154,294 (£8,939,647), wheat shipments to the Republic of India being mainly responsible for the increase.

Of the foreign countries the principal purchasers were the United States of America, £5,608,721 (£5,724,108); France, £5,367,920 (£5,700,082); Federal Republic of Germany, £3,441,811 (£2,829,868); Italy, £2,310,437 (£2,963,112); Belgium, £2,125,369 (£3,147,720); and Japan, £1,848,843 (£1,536,653).

Interstate exports totalled £23,654,934 (£19,594,967), of which New South Wales received £13,263,964 (£9,923,222); Victoria, £4,852,094 (£4,333,361); South Australia, £3,847,518 (£3,520,626); Northern Territory, £1,014,413 (£968,398); Queensland, £510,823 (£553,230); and Tasmania, £166,122 (£296,130).

The following are notes on the principal exports :—

Greasy Wool.

Both the quantity and the average value were less than for the previous year, 96,554,322 lb. (100,701,099 lb.), being exported for a value of £29,648,228 (£35,672,828).

Notable absentees from the list of buyers were Soviet Russia (£1,892,560), South Africa (£278,874), and Yugoslavia (£127,657).

The United Kingdom received 44,449,533 lb. for £13,684,395 (45,702,390 lb. for £16,160,286), other importing countries being France, £4,104,370 (£4,202,819); United States of America, £2,617,664 (£3,032,792); Italy, £1,794,635 (£2,313,697); Belgium, £1,738,994 (£2,298,181); Federal Republic of Germany, £1,395,306 (£1,352,157); and Japan, £1,251,445 (£1,096,742).

Scoured Wool.

Scoured wool exports totalled 13,261,323 lb. for a value of £5,633,302 (11,918,274 lb. for £5,457,140); China, £738,098 (£146,447); United States of America, £612,835 (£237,587), and the Federal Republic of Germany, £609,070 (£385,189) accounting for the principal increases.

Shipments to the United Kingdom totalled £1,905,210 (£2,360,643); France, £380,106 (£441,341); Italy, £240,861 (£415,810); Canada, £185,572 (£169,412); and Belgium, £167,947 (£314,829).

Wheat.

Exports during 1954–55 totalled 19,334,742 bushels (6,800,140 bushels) for a value of £13,738,962 (£5,635,764). The average f.o.b. value per bushel was 14s. 2½d. (16s. 7d.).

The Republic of India purchasing 8,932,075 bushels (1,403,210 bushels) for £6,363,423 (£1,151,788), and the United Kingdom, 7,909,851 bushels (4,783,557 bushels) for £5,577,923 (£3,962,434) were the principal buyers.

Wheaten Flour.

Four exports were again less than those of the previous year, the total being 2,406,851 centals for £3,609,745 compared with 2,956,983 centals for £5,851,806 in 1953–54.

PART IV.—TRADE, TRANSPORT AND COMMUNICATION.

I.—TRADE AND CUSTOMS.

Prior to the 15th November, 1947, Oversea Imports were valued in British currency and represented the F.O.B. value at Port of Shipment plus the statutory 10 per cent. imposed for value for duty purposes, in accordance with the Customs Act. From the 15th November, 1947, following an amendment to the Act, Oversea Imports have been valued in Australian currency F.O.B. Port of Shipment. In this Register all Oversea Imports are valued on the revised basis (values for the periods prior to 15th November, 1947, being re-computed) and, as Interstate Imports and all Exports have always been recorded in Australian currency, the values throughout are now expressed in uniform terms.

No. 1.—Value of Imports into and Exports from the State of Western Australia during the Years ended 30th June, 1954 and 1955, showing Origin of Imports and Destination of Exports.

No. 5.—IMPORTS during the year ended 30th June, 1955.

Details hereunder are a combination of Interstate Trade Statistics compiled by the State Government Statistician's Office and Oversea Trade Statistics compiled by the Commonwealth Statistician's Office, from documents supplied by importers and their agents.

Note A.—Prior to the 15th November, 1947, Oversea Imports were valued in British currency, and represented the F.O.B. value at port of shipment plus the statutory 10 per cent. imposed for value for duty purposes, in accordance with the Customs Act. From the 15th November, 1947, following an amendment to the Act, the 10 per cent. addition has been eliminated and Oversea Imports have been valued in Australian currency F.O.B. port of shipment. On all Interstate Imports 10 per cent, has been added to the F.O.B. value at the port of shipment.

Note B.—The "quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognized size, and consequently do not indicate the number, capacity, or weight of articles imported.

Note C.—The abbreviation N.E.I. is used throughout this table and means "Not elsewhere included."

Note D.—The following record of Imports has been compiled according to a Statistical Classification divided into 21 Classes, which came into operation on the 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages immediately prior to this page.

No. 6.—EXPORTS during the year ended 30th June, 1955.

Details hereunder are a combination of Interstate Trade Statistics compiled by the State Government Statistician's Office and Oversea Trade Statistics compiled by the Commonwealth Statistician's Office, from documents supplied by exporters and their agents.

Note A.—The value of goods exported is recorded in Australian currency. The basis of valuation is F.O.B., or its equivalent, at port of shipment.

Note B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size and consequently do not indicate the number, capacity or weight of articles exported.

Note C.—The abbreviation N.E.I. is used throughout this table and means "Not elsewhere included."

Note D.—The following record of Exports has been compiled according to a Statistical Classification divided into 21 classes which came into operation on 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Import and Exports are given on pages immediately prior to Table No. 5 (Imports).

Special Notes.

1. The boundaries of Road Board Districts have been adopted as Statistical Districts since 1928–29 in lieu of the districts as defined in previous years from the Sheet Lines of the Standard Plans of the Lands Department.
2. Statistics published in this " Part " are grouped in the new Statistical Divisions which became operative from 1st January, 1954. These coincide with the Regional Divisions of the State recognised for Governmental purposes. A map showing the revised Statistical Divisions is published facing page 6.
3. For Special Tabulations showing certain aspects of Mixed Farming see Part V of the Statistical Register for 1947–48.

VIII.—VALUE OF PRODUCTION.

NET VALUE—

The Annual Net Value of Production represents the sum available each year for distribution among those concerned in industry, i.e., workers, proprietors (including landlords), and providers of capital.

In combining industries this is the value that is used in order to avoid the inevitable duplication that would result if "Gross" or "Local" values were aggregated.

I. PRIMARY PRODUCTION.

(*a*) *Gross Value* is the value placed on recorded production at the wholesale price realised "at the principal market." In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the "principal market."

(*b*) *Marketing Costs*, which are deducted from "Gross Value" to obtain "Local Value," comprise Freight, Cost of Containers, Commission, and other handling charges.

(*c*) *Local Value* is the value recorded at the place of production, and is obtained by deducting "Marketing Costs" from "Gross Value."

(*d*) *The Value of Goods Consumed in the Process of Production* covers seed and fertilizers used, pickling, sprays, dips, fodder consumed, fuel and oil, repairs, and similar costs, and is deducted from "Local Value" to obtain "Net Value."

(*e*) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) after deducting from "Local Value" the "Value of goods consumed in the process of production." Such return is the sum available for payment of wages, interest, rent, and producer's own income.

II. MANUFACTURING.

The initial value taken is that of Output "at factory door." The Net Value of Manufacturing, comparable with the net value of primary production, is the value added in course of manufacture. It is derived from Output by deducting the value of goods consumed (*viz.*: materials used; fuel, power and light; lubricating oil; repairs to plant; containers, packings, etc.) and represents the sum available for payment of wages, rent, interest, depreciation, other overhead costs and for the manufacturer's own income.

III. GENERAL.

To secure a proper appreciation of the value of production as set out in the following tables it is well to keep in mind the following considerations:—The sum of the gross values of the several agents of production contains substantial duplications. The total value realised for a season's wheat, for instance, includes cost of transport, commission, and other handling charges, which items form the incomes of those performing these services. Similarly, the Local Value includes value of fertiliser, etc., used, which item will have been included in the value of manufactured production. Again, fodder grown and valued as an agricultural product would also, if fed to milch cows, be duplicated in the value of dairy production. When, however, *net* values are being ascertained, the value of such fodder consumed is deducted as a cost against dairying, thus eliminating duplication. Thus, while Gross Value represents a very accurate estimate of the value of the production of any particular industry, *only Net Values should be aggregated in arriving at a total value of "All Recorded Production."* The ratio of Marketing Costs to Gross Value of Production varies greatly as between industries. Thus, the great bulk of forestry production sustains no marketing costs, as the logs form raw material for a secondary industry (saw-milling) without being "marketed." For this reason all forest products were valued prior to the year 1933–34 at place of production before any marketing costs were incurred. Commencing with 1933–34, however, marketing costs, together with cost of goods consumed in process of production, have been taken into account where actually incurred. In any case, the statement of net values is not affected and is comparable throughout.

Part VI.—FACTORY STATISTICS.

DEFINITION.—For Statistical purposes, a factory is an establishment which is engaged in the processes of manufacturing, assembling, treating or repairing and in which four or more hands are employed at any period during the year or power driven machinery is used.

SPECIAL NOTES—

Employment.—*Figures relate to the factory proper and exclude persons engaged in obtaining raw materials (e.g., persons employed by sawmills in felling and hauling logs) or persons engaged in selling or distribution (e.g., persons employed by Electricity Generating Stations or Gas Works on transmission and distribution). Working proprietors are included unless otherwise stated.*

The average number of persons employed is quoted on two different bases : the average during the period of operation and the average over the whole year. The former is a simple aggregate of the average weekly number of persons employed in each factory during the period worked. The latter is calculated by reducing the number of persons employed in those factories operating for less than twelve months to an equivalent number working for a full year. The type of average used is indicated on each Table.

Net Value of Manufacturing.—*This item, shown herein as "Value of Production" or "Net Production," is the value added in the course of manufacture. It is derived from Output by deducting the value of goods consumed (viz., materials used ; fuel, power, and light ; lubricating oil ; repairs to plant : containers, packings, etc.) and represents the sum available for payment of wages, rent, interest, depreciation, other overhead costs and for the manufacturer's own income.*

Statistical Divisions.—*Divisions referred to in this publication conform with the revised Statistical Divisions which became operative from 1st January, 1954, and coincide with the Regional Divisions of the State recognised for Governmental purposes. A map showing the revised Statistical Divisions appears in Part V. of the Statistical Register.*

(*a*) It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935, onwards, of certain factories previously not included. This tends to exaggerate the degree of recovery.

* Revised to a "Fiscal Year" Mean in place of a "Calendar Year" Mean.

PART XII.—RETAIL PRICES, WAGES, EMPLOYMENT, AND MISCELLANEOUS.

I.—RETAIL PRICES

This section gives details of Retail Prices, Consumption of Foodstuffs, etc., and Retail Price Index Numbers.

RETAIL PRICES.

Retail Prices of selected groups of commodities and services are collected regularly by the Government Statistician from representative informants in the more important towns of Western Australia.

From 6 towns, prices are obtained for regimens covering (*a*) 41 items of Food and Groceries. (*b*) Rents of 4 and 5-roomed Houses, (*c*) 80 items of Adult and Juvenile Clothing, and (*d*) 27 items of Household Drapery and Utensils, and in addition, other items of Miscellaneous Expenditure, such as Fuel and Light. Prices of Food and Groceries only are collected from a more extensive list of towns. Informants are required to furnish prices monthly (prices as at the middle of the month) for Food and Groceries and quarterly (particulars as at the 15th of the middle month of each quarter) for House Rents, Clothing, and Miscellaneous items.

Specific grades and qualities have been established for the various items included in the regimen in order to ensure that all informants throughout the State shall quote consistently for articles of the same standard. The collection of data in the Metropolitan Area, Kalgoorlie-Boulder, Northam, Bunbury, and Geraldton—the "five towns" of Western Australia in the several Commonwealth retail price index series—is made under the authority of the Commonwealth Census and Statistics Act, 1905–1949. The State Statistical Department directly supervises the collection of data for the Commonwealth Statistician. The actual collection of returns is carried out by specially qualified field officers of the Commonwealth Bureau of Census and Statistics, who are attached to the State Department. These officers check prices and standards in the shops of informants, and inspect houses listed on the rent returns.

In those towns where returns are required under the State Statistics Act, 1907, the method of collection is substantially the same as that outlined above.

During the war years 1939–45 unusual difficulty was experienced in obtaining prices for the compilation of several of the abovementioned series, due mainly to the scarcity and sporadic supply of certain types of goods and to changes in the grade and quality of such. Difficulties were most pronounced in the case of the clothing section and the household drapery and utensil section of the miscellaneous series, necessitating in some cases the substitution of new grades, qualities or types of articles for those formerly included in the regimen, or again the adoption of various statistical devices to overcome the effects of the absence of quotations for goods temporarily off the market or in short supply.

In some measure the problem remained under early post-war conditions, as some goods were still in short supply and stocks were extremely variable. It should be noted, however, that all practicable steps are taken to preserve the statistical integrity of the index.

Food and Groceries.

The regimen of Food and Groceries commodities adopted for the several index series issued by the Australian Statisticians is set out in Table No. 1. This shows the average prices quoted by retailers in the Metropolitan Area during each month of 1955.

CONSUMPTION OF FOODSTUFFS, ETC.

No. 2.—Estimated Annual Consumption of Foodstuffs, Beverages and Tobacco.

Details of the estimated annual consumption of some of the more important food commodities consumed in Western Australia are shown in this table. Particulars of the consumption of spirituous and alcoholic liquors and tobacco preparations are also given.

The figures have been derived from records of production, imports and exports, for the years 1950–51 to 1954–55, and show the average amounts consumed annually per head of population during that period. They include quantities used in manufacturing, such as flour in biscuits, bread, etc. ; sugar in jam, and so on.

Where the necessary data were available, adjustment has been made for movement in stocks, and for exports as ships' stores.

RETAIL PRICE INDEX NUMBERS.

In this section are shown Index numbers computed from retail prices returns furnished by informants in the more important towns of the State.

These Index numbers cover selected "regimens" (or lists of commodities or services) comprising items of—

I.—Food and Groceries,

II.—Housing (Rents of 4 and 5-roomed Houses),

III.—Clothing, and

IV.—Miscellaneous Household Expenditure,

all of which are combined in the regimen used for the "C" Series Index.

The Price Index series simply measure variations in the aggregate cost of a given regimen of commodities at various intervals of time or as between different towns, and are intended for use as approximate measures of general retail price movements in the commodity classes to which they refer. In this connection it cannot be too strongly emphasised that they do not, and are not, intended to measure an absolute "cost of living," *vide* Commonwealth Statistician's Labour Report No. 21, Appendix "Wages and Prices," page 167.

In the series set out in the following pages the Index numbers themselves represent the several "aggregates" expressed as relatives of the weighted average "aggregate cost" of the same regimen in the six capital cities over some specific interval of time, *e.g.*, the five years 1923 to 1927.

To ensure that the series shall be as reliable as possible, the commodities comprising the complete regimen have been selected to conform to the following conditions :—

1. They must be such that they can be clearly and definitely described.
2. They must be capable of standardisation, and mean the same thing at different times and places.
3. They must not be subject to violent or extreme seasonal fluctuations (hence, in general, fresh fruit and vegetables are excluded from the regimen).
4. They must be in common use, and their usage must comprise an appreciable proportion of the total consumption of the commodity group to which they relate, and moreover, remain relatively constant.
5. On the whole, they must be a fair sample of the commodity group which they purport to represent.

No. 3.—Food and Groceries—Five Principal Towns.

This table sets out Index numbers representing variations in the prices of Food and Groceries in each of the five Western Australian towns covered by the Commonwealth Statistician's inquiries. The table also gives weighted averages for the "five towns," and the six capital cities of the Commonwealth. Weighting is on a population basis.

RETAIL PRICE INDEX NUMBERS—*continued.*

No. 7.—Clothing—Five Principal Towns.

Variations in the prices of the clothing regimen are given in the table hereunder. The regimen is based on the requirements of a nominal family unit of five persons, comprising a man, woman, boy (aged 10½ years), girl (aged 7 years), and boy (aged 3½ years). These persons are taken as representative respectively of men over seventeen years, women over seventeen years, children ten to sixteen years, children five to nine years, and children under five years.

Within each section, the items are weighted according to their relative consumption by the type of person concerned, and the sectional aggregates themselves are brought together in one composite aggregate after they have been weighted in accordance with an appropriate population factor. This factor represents the proportion which each age group bears to the total population.

No. 9.—Food and Groceries, Housing, Clothing and Miscellaneous ("C" Series)—Five Principal Towns.

This table combines together in one series, the index numbers of Food and Groceries, Housing, Clothing and Miscellaneous Expenditure appearing in the preceding pages. This is the Commonwealth Statistician's "C" Series index of Retail Prices. The "C" Series index numbers were adopted by the Commonwealth Court of Arbitration as the basis for the adjustment of the wages declared in its judgment of the 17th April, 1934. From the 1937 Basic Wage judgment, until the 12th September, 1953, the Commonwealth tribunal used special "Court Series" based on the "C" Series.

RETAIL PRICE INDEX NUMBERS—*continued.*

Five Principal Towns, Six Capital Cities and Collie—Each Series.

Tables Nos. 11 to 15 compare movements among the several Index series in each of the Commonwealth Statistician's "five Western Australian towns," while Tables Nos. 16, 17 and 18 give similar details in respect of the weighted average of these towns, the six capital cities and Collie.

Note.—Each series has been given its own base. This is the weighted average cost of the particular regimen concerned, for the six capital cities, during the period 1923–27. The Index numbers cannot, of course, be compared with each other horizontally in order to show the relative costs of the different regimens, since the base of each series has been made equal to 1000.

II.—WAGES.

No. 19.—State Basic Wage.

Under the provisions of the Industrial Arbitration Act, 1912-50, authority is vested in the State Court of Arbitration to declare an annual Basic Wage, which, until 1950, was operative from the 1st of July each year.

The first decision of the Court took effect on the 1st July, 1926, and prescribed a rate of £4 5s. 0d. for males and £2 5s. 11d. for females throughout the whole of the State. In fixing the male rate, the Court divided the wage into four elements, viz., Food and Groceries, Rent, Clothing and Miscellaneous Expenditure, and allowed amounts for each of these elements to meet the requirements of a family unit of four, comprising a man, his wife and two children. For Food and Groceries the amount was equivalent to the Piddington Commission's standard for this section (reduced to provide for a family unit of four) ; for Rent, the average rental of four and five-roomed houses ; for Clothing, an amount approximating the sum fixed for such expenditure by the New South Wales Board of Trade in 1925, and for Miscellaneous an amount based on the Piddington Commission's finding.

These rates remained unaltered until the 1st July, 1929, when the amounts were increased to £4 7s. 0d. and £2 7s. 0d. respectively, with the exception of certain specified goldfields areas, in respect of which the previous wage was retained.

A revision by the Court following the 1930 inquiry resulted in the declaration of a separate wage of £4 6s. 0d. for males and £2 6s. 5d. for females, in respect of the Metropolitan Area, and rates of £4 5s. 0d. and £2 5s. 11d. respectively for all other parts of the State.

Additional power was given the Court under the provisions of the Industrial Arbitration Act Amendment Act, 1930, to enable quarterly adjustments to be made to the annual declaration, and on the 3rd March, 1931, rates of £3 18s. 0d. for males and £2 2s. 2d. for females were prescribed for the Metropolitan Area, while all other parts of the State were fixed at £3 17s. 0d. and £2 1s. 8d. respectively.

The annual declaration operative as from the 1st July, 1931, did not vary these amounts, but a further quarterly adjustment on the 18th August, 1931, marked the inauguration of a different wage for agricultural areas, which are taken to be those areas comprised within the official South-West Land Division as gazetted under the Land Act.

Wage levels in all divisions of the State were considerably increased as from the 1st July, 1938, following the most comprehensive inquiry since the original declaration. In the course of the 1938 inquiry, special consideration was given to the factors of National Income and Standard of Nutrition. In the case of the Rent and Miscellaneous elements of the wage the "old" standards remained unchanged. For Clothing, however, the Court adopted the Piddington "standard"—reduced to provide for a family unit of four—and for Food and Groceries, the Piddington standard plus an amount of 1s.

At a sitting of the Court held on 26th February, 1942, to consider the quarterly adjustment of the basic wage, the Court decided that, in the light of existing economic conditions, there should be no alteration to the rates then in force. This decision marked the first occasion upon which the Court, in the exercise of the discretionary powers conferred upon it under the Act, had refrained from making a quarterly adjustment to the wage to equate its purchasing power to the "standards" of the relevant annual declaration. It was followed by a similar decision given on 29th April, 1942, when the Court reaffirmed that no adjustment would be made to existing rates, despite further increases in retail prices.

On 11th June, 1942, the Court in its annual declaration adopted the rates which had operated since 28th July, 1941, as its new base, and these remained in force until 8th August, 1942, when they were superseded by a Basic Wage Adjustment Order made by the Premier on 7th August under the authority of National Security (Economic Organisation) Regulations. The rates established under this Order were substantially the current equivalents of the standards adopted by the Court in its annual declarations, 1938-1941.

These standards were re-adopted by the Court for the purposes of the quarterly adjustments made on the 30th October, 1942, and subsequently until the Court's Interim Basic Wage Declaration of the 26th February, 1947. In this declaration which was made under powers conferred by an amendment (December, 1946) to National Security (Economic Organisation) Regulations the basic wage was increased by a loading of 5s. This loading was varied proportionately to the remainder of the basic wage in subsequent declarations and quarterly adjustments.

The Industrial Arbitration Act Amendment Act of 1950 provided, *inter alia*, (1) that basic wage determinations may be made at any time during the year at intervals of not less than twelve months subject only to quarterly adjustments and (2) that in such determination the Court must give due consideration to the economic capacity of industry. Pursuant to this enactment and subsequent to the judgment of the Commonwealth Court, the State Court increased the basic wage in all Divisions by £1 for males and 15s. for females as from the 18th December, 1950. It also decided in February, 1951, that subsequent quarterly adjustments should be based on variations in the "C" Series Retail Prices Index Numbers. On the 28th November, 1951, the Court declared the Basic Wage for females at 65 per cent. of the male rate, to operate as from the 1st December, 1951.

On the 13th November, 1953, and for each quarter thereafter up to, and including, the decision of the 27th April, 1955, the Court again exercised its discretionary powers, conferred by Section 127 of the Act, and determined that no change should be made in the Basic Wage although there were appreciable movements in the "C" Series Retail Prices Index.

As from the 9th August, 1955, the Court reverted to the practice of making quarterly adjustments.

The following table shows annual declarations and certain interim variations since the originla decision of 1926, which remained unaltered until 1st July, 1929.

No. 20.—Commonwealth Basic Wage.

By an amendment of 1949 to the Commonwealth Conciliation and Arbitration Act, the basic wage for an adult male worker is defined in Section 25 as " that wage, or that part of a wage, which is just and reasonable for an adult male, without regard to any circumstance pertaining to the work upon which, or the industry in which, he is employed." The section contains a similar definition of a basic wage for females. Before the inclusion of this amendment, the Act empowered the Court to prescribe a " minimum rate of wage " but it neither defined, nor provided for the determination of, a specific " basic wage." In general terms, however, the basic wage was understood to be identifiable as the minimum wage (including " loadings ") payable to an adult unskilled labourer. (A " loading " may be defined as an addition to the " basic " wage as compensation for some peculiar condition of labour or environment or other circumstance, and not by way of " margin for skill.")

The history of the Commonwealth basic wage is summarized below :—

(1) Until 1934, rates were based on the " Harvester " judgment delivered by Mr. Justice Higgins in 1907, which fixed 42s. per week for Melbourne as a reasonable amount to meet the needs of " a family of about five."

From 1913 up to the end of 1921, the basic wage was simply a " Harvester " equivalent, rates being fixed by varying the original Harvester wage in accordance with movements in the purchasing power of money as disclosed by the Commonwealth Statistician's " A " Series index numbers covering items of food and groceries and rents of " all houses." Up to 1918 the Court, in computing " Harvester " equivalents, used the index numbers for the previous calendar year. From 1918 to the end of 1921 the figures for the next preceding four quarters were used, and from 1921 onwards the index numbers for the latest quarter available. In that year the Court began to insert provisions in awards for the automatic adjustment of wages according to quarterly movements in the " A " Series index, and a loading—subsequently known as the "Powers 3s."—was added to the " Harvester " equivalent by Mr. Justice Powers to ensure that over a period of rapidly rising prices the worker would suffer no loss of real wages in the interval between the adjustment of rates.

The method of fixation and adjustment remained unaltered until after the onset of the depression. Then in 1931 the Court, having satisfied itself that unfavourable economic conditions prevented the maintenance of real wages at their existing level, directed that, with certain exceptions, all wages under its jurisdiction should be reduced by 10 per cent. as from the 1st February of that year.

In its judgment of May, 1933, the Court concluded that the method of adjusting wages to conform to variations in the "A" Series index numbers had resulted in a decrease of real wages beyond the prescribed percentage. To correct this movement it adopted the use of the " D " Series index.

(2) In a judgment delivered in April, 1934, the Court introduced an entirely new basis for the fixation of the basic wage. The " Harvester " standard supplemented by the Powers loading was discarded and a fresh starting point selected. The new wage was largely founded upon a declaration of 84s. per week made by the New South Wales Board of Trade in August, 1925. As this amount took into consideration the upward tendency of prices, the Court regarded the rate as applicable to the year 1926. The " C " Series index number for Sydney for that year was 1033, and for the December quarter of 1933 stood at 829. Thus an amount of 84s. in 1926 had the same purchasing power as 67s. in 1933, which became the rate applicable in Sydney from the 1st May, 1934. The equation of this wage to the index number 829 established the relationship, 1000 in the " C " Series index = 81s. in the wage and, by applying the factor 0·081 to the " C " Series index number for any town or group of towns at any time, the wage in shillings could be readily computed. Owing to adverse industrial conditions in South Australia and Tasmania, the new rates for Hobart and Adelaide were graduated so as not to come into full operation until the 1st June, 1935. The date on which future periodical adjustments were to become operative was altered to the first pay period in the months of June, September, December and March. Adjustments were continued on this basis until 1940, since when they have taken effect from the beginning of the second month after the end of each quarter.

(3) The hearing of a claim by the combined unions for an increase in the basic wage was concluded in June, 1937. The Court, in fixing a new rate, transferred the basis of the adjustment of wages from the " C " Series to a special " Court " Series based upon the relationship between wages and index numbers which had been established in 1934. This Court Series was, in effect, nothing more than a table expressing in shillings the wage rates derived by the use of the conversion factor 0·081. The Court's judgment further provided for the addition of " prosperity loadings " to the rates so derived, which came to be designated the " needs portion " of the wage. The amount of the loading applied to the " needs " wage for Sydney, Melbourne and Brisbane was 6s., for Adelaide, Perth and Hobart, 4s. and for the Six Capital Cities as a whole, 5s.

(4) In general, the method of the 1937 judgment was retained by the Court until its " interim " decision of the 13th December, 1946 when, in granting an increase of 7s. per week in the " needs " portion of the wage, it inaugurated a Court Index (Second Series). In fixing the base of this

new series, the " C " Series index number (1146) for the Six Capital Cities as a whole in the September quarter, 1946 was equated to the " needs " portion (100s.) of the new Six Capitals wage. This established the base, 1000 in the " C " Series index = 87s. in the wage. The immediate monetary effect was to increase by 7s. per week the " needs " wage in each of the capital cities with the exception of Hobart, where the increase was 6s. The prosperity loadings were retained at their original levels.

(5) On the application early in 1949 of certain unions seeking, among other things, an increase in the basic wage the Court, after an exhaustive examination of the Australian economy, declared a general increase of 20s. per week. Judgment was delivered on the 12th October, 1950, the new rates to be operative from the first pay period in December. The Court also introduced a Court Index (Third Series) based upon the equation of 1572 (the " C " Series index number for the Six Capital Cities as a whole in the September quarter, 1950) to 162s., the increased weighted average wage for the Six Capitals (made up of the " needs " portion 137s., plus a uniform prosperity loading of 5s., plus the additional 20s. awarded by the Court). In this way, 1000 in the " C " Series index became equal to 103s. in the wage. In determining the new rate of payment, a uniform amount of 25s. was added to the existing " needs " basic wage, with the concurrent discontinuance of the prosperity loading as a separate entity. This had the effect of increasing the basic wage in Sydney, Melbourne and Brisbane by 19s., in Adelaide, Perth and Hobart by 21s., and for the Six Capital Cities as a whole by 20s. From, and including, the first pay period in February, 1951 the rates so determined were to be subject in their entirety to quarterly adjustment in accordance with movements in the Court Index (Third Series). Thus the components " needs portion " and " prosperity loading " ceased to exist as separate and distinguishable parts of the wage.

(6) Following applications by employers' organisations requesting, amongst other things, " that the system of adjusting the basic wages in accordance with variations occurring in retail price index-numbers be abandoned " and counter claims by employees' organisations for increases in the basic wage for adult males, the Court, on the 16th September, 1952, commenced hearing evidence in what has come to be known as the " Basic Wage and Standard Hours Inquiry 1952–53." Submission of evidence continued intermittently until the 11th September, 1953, and on the following day the Court announced its decision. The application for discontinuance of the system of adjusting the basic wages in accordance with variations in the retail price index-numbers was granted ; all of the other applications were refused. On the 27th October, in stating the reasons for its decisions, the Court made it clear that, as in its opinion there should be no departure from " its now well established principle that the basic wage should be the highest that the capacity of the community as a whole can sustain " and as it had " withdrawn from relating the basic wage to the fulfilment of any particular standard of needs," the Court " finds it impossible to justify the continuance of an ' automatic ' adjustment system whose purpose is to maintain the purchasing power of a particular wage (assessed with regard to the capacity of industry to pay such wage in 1950)." In consequence, the basic wages which became operative on the 1st August, 1953, will stand until there is another general review by the Court.

DWELLINGS SUMMARY, WESTERN AUSTRALIA—CENSUSES OF 1947 AND 1954.

In Tables Nos. 43, 44, 45, 48, 50, 51, and 52 figures are shown separately for "Metropolitan Urban" "Other Urban," and "Rural."

"Metropolitan Urban" comprises the Metropolitan Statistical Division.

"Other Urban" comprises—

(1) all country municipalities; and

(2) towns outside the Metropolitan Statistical Division not separately incorporated for purposes of local government but whose boundaries were specially determined for Census purposes, and which had a population of 1,000 or more at the Census.

"Rural" comprises all that part of the State not included in "Metropolitan" and "Other Urban."

For the purpose of the Census a "*dwelling*" is any habitation occupied by a household group living together as a domestic unit whether comprising the whole or only part of a building.

No. 43.—Occupied Dwellings, according to Class.

(Exclusive of dwellings occupied solely by full-blood Aborigines.)

Grand Total, Dwellings	66,730	58,037		124,767	90,741	27,217	44,865	162,823

(*a*) In previous Censuses dwellings returned on the Schedules as Sheds, Huts, Garages, etc., were included with Private Houses. In the Census of 1954 these dwellings are shown in tabulations as a separate group whenever practicable, but are linked with Private Houses to preserve continuity with past Census results.

(*b*) "Share of Private House" is a portion of a shared Private House which is occupied separately and for which portion a separate Householder's Schedule was furnished.

(*c*) "Flat" is part of a House or other building which can be completely closed off and which includes both cooking and bathing facilities.

(*d*) "Other" Private Dwelling is part of a building which is not a self-contained unit. It may be an apartment, rooms, etc.

(*e*) "Dwellings Other than Private" include Hotels, Boarding Houses, Lodging Houses, Hostels, Hospitals, Educational, Religious and Charitable Institutions, Defence and Penal Establishments, etc.

RETAIL SALES STATISTICS.

1. *Introduction.*

The figures in the following tables, which relate to the activities of retail establishments in Western Australia, are supplied by the Commonwealth Statistician.

Table No. 54 is an extract from a quarterly statistical statement " Retail Sales of Goods," which contains similar information for each of the other States and for the Commonwealth as a whole. Tables Nos. 55–61 have been extracted from Bulletins Nos. 6 and 13 of the Census Retail Establishments for the year ended 30th June, 1953.

Throughout the tables, the particulars shown relate to sales of goods (as distinct from services, accommodation, entertainments, meals, etc.) made to the public by establishments selling retail goods from fixed premises such as shops, rooms, kiosks and yards. Retail sales of establishments otherwise principally engaged in wholesale, manufacturing or service activities are included. Data for the years 1948–49 and 1952–53 were obtained from Censuses taken in respect of those years. Particulars for other periods, shown in Table No. 54, are adjusted estimates derived from a quarterly sample survey.

In addition to the two Censuses of Retail Establishments already mentioned, information is available from the first such Census, which related to the year ended 30th June, 1948. However, these statistics are not as detailed as those shown in the following tables and comparisons, where they occur, have been confined to the results of the Censuses of 1948–49 and 1952–53.

2. *Scope of Census.*

The Censuses have been designed principally to cover sales to the final consumer of goods generally used for household and personal use. For this reason, sales of farm and industrial machinery and equipment, earth-moving equipment, etc., have been excluded. In the first two Censuses sales of building materials (except timber) were included, but in this Census all building materials have been excluded. All retail sales of motor vehicles, parts, etc., are included whether for industrial, commerical, farm or private use. Business machines such as typewriters are also included when sold from a retail establishment.

Wholesalers and manufacturers are included if they sell *regularly* by retail, but not if they make retail sales only occasionally. Itinerant vendors and casual stalls or booths are excluded as are such organisations as clubs and societies making sales to their own members. Both new and second hand goods are included in sales recorded by relevant retail establishments.

Because of the above-mentioned restrictions to the scope of the Census, the aggregates shown for some commodity groups may be less than the *total* value of goods sold to consumers by all establishments regardless of definition. In particular, this applies to tobacco, and beer, wine and spirits which are also sold by establishments not included in the Census. However, some additional details of sales of these items were obtained from a supplementary collection of licensed clubs, etc.

In addition to ordinary retail shops, as generally understood, the Census *includes* the following :—

Hotels, wine saloons, and refreshment rooms.
Bakers, whether selling from retail premises or from a vehicle.
Produce Merchants.
Tailors.
Garages and service stations, motor vehicle distributors.
Gas and Electricity suppliers, in respect only of their retail sales of appliances.
Fuel and Ice Merchants, with retail premises but not all those selling only from a vehicle.

The following types of activities are *excluded* :—

Opticians and optometrists.
Clubs, guest houses, theatres and cinemas.
Agents (except in respect of goods sold on own behalf).
Dry Cleaners and Laundries.
Direct selling (either on site or from delivery vehicles) from market or flower gardens, nurseries, dairies, poultry farms, chick hatcheries, except where a shop or regular roadside stall is conducted.
Hawkers, street barrows, casual stalls and street sellers.
Timber yards and joinery works.
Brick works
Roofing tile works.
Trade services such as monumental masonry, carpentry, electrical contracting, plumbing, upholstery, etc.
Real estate agents, stock and station agents.
Newspaper publishers and printers (except in respect of goods sold by retail from a shop).
Photographers and picture framers.
Dressmakers.
Caterers for special occasions (races, sports meetings, etc.).
Chiropodists.
Herbalists.
Lending libraries.

RETAIL SALES STATISTICS—*continued.*

3. *Lists of Establishments and Collection of Returns.*

The work of listing of retail establishments to be included in the 1952–53 Retail Census was carried out by postal officers throughout Australia. The lists were checked against the 1948–49 Retail Census lists and, where necessary, against other available sources of information, such as trade directories, lists of liquor licenses, etc., and minor deficiencies were rectified.

Census forms were distributed and collected by post and, where necessary, for elucidation of facts, additional enquiries were addressed to retailers.

4. *Census and Statistics Act*, 1905–49.

The Census was conducted under the authority of the Census and Statistics Act, 1905–49, under the terms of which all returns supplied by traders must be treated as strictly confidential and disclosure of information shown on individual returns is prohibited. Consequently, in the tables set out in this Bulletin some aggregates which refer to a small number of establishments have either been grouped with others or withheld from publication in order to avoid risk of disclosure of confidential information.

5. *The Census Form.*

On the Census form, clear distinction was drawn between :—

(1) Retail Sales of goods ;

and (2) " Other Takings," including payment for services often associated with retailing. These are hairdressing, repairs, meals, accommodation, laundry and dry cleaning, etc.

The form provided a separate heading for " Wholesale Sales of Goods " in order to avoid their being incorrectly included under any other heading.

Two of the commodity groups shown in the retail section of the form, namely Basic Building Materials and Farm Machinery and Implements were listed separately to ensure that details of these sales were not included under any of the other retail groupings. Sales of these commodities are not included in the aggregates shown in this Bulletin.

Two general qualifications are needed to explain the figures of sales recorded :—

(1) Where actual figures were not available traders were asked to supply careful estimates of total retail sales and of sales by commodity groups.

(2) As it was impossible to define or list in detail the types of goods to be included under each commodity group, traders were asked to show figures for each group in accordance with ordinary trade groupings as understood by them. The commodity group totals are therefore subject to this qualification. In particular, despite numerous queries made when returns were being examined, it is possible that traders did not always show separately sales of Tobacco, Cigars and Cigarettes in the item provided on the form.

6. *Coverage.*

Returns were received from slightly more than 97 per cent. of the establishments to which forms were sent. The remainder consisted of small businesses for which estimated figures are included in the Census tables.

Establishments which operated for only part of the year are included in the figures shown in this Bulletin. Where changes of ownership rendered it impossible to obtain a return for the full year's operations of an establishment, estimates for the complete year were made.

7. *Explanation of Terms used in the Tables.*

Commodity Group—the thirty-two broad groups (reduced for tabulation purposes to thirty) into which traders were asked to dissect their total retail sales of goods.

Other Types of Food—includes retail sales of fish, poultry, cooked meat, wrapped lunches, etc. but excludes takings from meals sold in cafes, restaurants, etc., for which a separate dissection was obtained under " Other Takings."

Other Goods—comprises goods which are not covered by the thirty-one specified groups and includes bicycles, flowers, plants, garden supplies, toys, sewing machines, baby carriages, medical and surgical supplies, photographic equipment, etc.

Main Type of Business—is a classification of each establishment according to the predominant type of goods sold or service rendered. The classification was based mainly on the dissection of commodity sales recorded on the Census form but, in some cases, namely, Other Food and Other Goods, the description given by the proprietor was used as a guide. For the purpose of determining the predominant type of goods sold some combinations of commodity items were considered as " main lines," *e.g.*, Clothing and Drapery (Men's and Boys' wear ; Women's, Girls' and Infants' wear ; and Drapery Piecegoods, Manchester, etc.). Accordingly, establishments were classified to type of business on the basis of the predominant " main line " of goods sold or service rendered and where the " main line " consisted of a combination of items, the classification was made to the major item within the " main line."

RETAIL SALES STATISTICS—*continued.*

Retail Turnover Size—is a classification of establishments according to the total value of retail sales of goods recorded on the form after the deletion of any sales of basic building materials or farm machinery. Details of " Other Takings " recorded are not taken into account for purposes of this classification.

Stocks of Goods on Hand and Method of Valuation—figures shown for stocks of goods on hand at 30th June, 1953, represent the total value of goods held for retail sale by establishments with stocks of more than £500 at that date. Retail stocks of less than £500 held by individual establishments are excluded from the figures. Details of stocks shown are aggregates of the figures supplied on individual returns without any adjustment for different methods of valuation (cost price, market price, replacement cost, etc.).

Metropolitan Area—as defined for statistical purposes includes the city proper and adjoining urban areas. The names of Local Government Areas included in the metropolitan area of Perth are shown in Table No. 59 and on the map of Western Australia in Part V of the Statistical Register.

Statistical Retail Areas—these areas have been designed for Retail Census purposes and are groups of contiguous Local Government Areas within Statistical Divisions. In Western Australia the metropolitan Statistical Division has been divided into seven Statistical Retail Areas but each of the remaining Statistical Divisions has been regarded as a Statistical Retail Area, with the exception of Central, North-West, Pilbara, and Kimberley Statistical Divisions which, combined, form one Statistical Retail Area. Names of Local Government Areas included in each Statistical Retail Area and Statistical Division are shown in Table No. 59.

8. *Comparison of* 1948–49 *and* 1952–53 *Census results.*

In some tables comparisons are shown of the 1948–49 and 1952–53 Retail Census results. In general, the scope of the 1952–53 Census follows the same general principles adopted for the earlier Census and as a result the same types of establishments are included in both Censuses. However, establishments with total retail sales of less than £500 were excluded in 1952–53, whereas only those with less than £50 in 1948–49 were excluded from the tabulations. In 1952–53 there were an additional 294 establishments in Western Australia with retail sales of less than £500 but more than £100, with total retail sales of £85,000. These establishments, which were excluded from the tabulations, represent approximately 3·7 per cent. of the total number of establishments in Western Australia but the amount of their sales was not significant (less than 0·1 per cent. of the total).

A more detailed dissection of total retail turnover was obtained in 1952–53 (32 groups in 1952–53 and 17 in 1948–49) but comparability of commodity groups has been maintained as the additional dissections relate mainly to further break-downs of the 1948–49 groups. However, sales of building materials (except timber) where sold by retailers are included in the 1948–49 Census figures, whereas, all building materials are excluded from the 1952–53 Census. Sales of farm machinery and implements, obtained separately on the 1952–53 Census forms, are excluded from the tabulations. These sales were also excluded as far as possible in the 1948–49 Census.

The method of classification to type of business used in 1952–53 has been explained in Section 7. In 1948–49 the description of business given by the proprietor formed the basis of the classification to type of business, although in cases where the description given did not indicate the nature of goods sold (*e.g.*, general store, variety store, etc.), type of business was determined by the commodity group in which the largest sales were recorded. Differences in coding procedure between the two Censuses would affect only those establishments with sales of approximately equal value in two or more commodity groups. Some such composite establishments may have been coded to one type of business in 1948–49 when classified in accordance with the description of business given, but to another type of business in 1952–53 when classified in accordance with the " main line " with the largest sales.

No. 54.—Value of Retail Sales Classified According to Commodity Groups
Western Australia : 1948–49 to 1954-55

The figures in the table below relate to goods (as distinct from services, accommodation, entertainments, meals, etc.) sold to the public by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards). The table contains particulars of retail sales of goods for the years 1948–49 to 1954–55 on a comparable basis throughout. The figures for the years 1948–49 and 1952–53 were obtained from Censuses taken in respect of those years, whereas particulars for the other periods shown are estimates based on sample surveys.

(*a*) Total value of *all* commodities sold by retail by the types of business shown. (*b*) Establishments with total retail sales of £50 or more in 1948–49. (*c*) Establishments with total retail sales of £500 or more in 1952–53. In this year there were 294 establishments in Western Australia with retail sales of less than £500 but more than £100, with total retail sales of £85,000. (*d*) Total value of stocks held for retail sale by all establishments with retail stocks of more than £500 at 30th June, 1953. Stocks were not included where values for individual establishments were less than £500. Therefore in some types of business (particularly in the Food, Hotels, Tobacconists, etc., groups) where a large proportion of establishments had stocks of less than £500 at 30th June, 1953, the values shown may be substantially less than the total value of stocks held by all establishments classified to that type of business. (*e*) Cafes, restaurants, etc., selling goods. Excludes those selling meals only. (*f*) Includes establishments whose main type of business is Basic Building Materials. (*g*) Includes sales by establishments whose main type of business is Basic Building Materials. (*a*) Establishments with total retail sales of £500 or more in 1952–53. In this year there were 294 establishments in Western Australia with retail sales of less than £500 but more than £100, with total retail sales of £85,000. (*b*) Total value of *all* commodities sold by retail by the types of business included in the Census. (*c*) Total value of *all* stocks held for retail sale by establishments with retail stocks of more than £500 at 30th June, 1953. In some types of business (particularly in the Food, Hotels, Tobacconists, etc., groups) a large proportion of establishments had stocks of less than £500 at 30th June, 1953. In these cases the values shown may be substantially less than the total value of stocks held by all establishments classified to that type of business.

(a) The index numbers appearing in these four columns cannot be compared horizontally to show the relative levels of the groups since the prices aggregate in each group in the base period is made equal to 1,000.

(b) The "C" Series index figures combine together in one series the index numbers relating to food and groceries, rent, clothing, household drapery and utensils, fuel and light, and other miscellaneous items of household expenditure. They may be used directly to show the relative levels in different places and at different times.
